

PARTNERSHIP INTRODUCTION

Dear Community Partner,

At ***Curls & Caregivers***, we provide tailored programs that combine practical life skills, personal grooming, and holistic wellness for youth, while equipping caregivers with tools and guidance to support their growth. Our workshops are interactive, trauma-aware, and measurable — ensuring every participant gains skills they can apply immediately.

We know that hair is more than appearance — it is identity, culture, and confidence. Through our workshops, resources, and partnerships, we provide hands-on education, starter kits, and affirming materials that help youth feel proud of who they are while equipping caregivers and professionals with the knowledge to support them. Measured outcomes include:

- Increased youth self-confidence and self-expression in post-program assessments
- Improved caregiver understanding and ability to support youth's personal care and wellness
- Positive feedback from youth and caregivers through surveys

We offer flexible options, including annual partnerships, one-time workshops, and custom agency packages, all designed to align with your schedule and funding structure.

Partnering with ***Curls & Caregivers*** is easy — our process is designed to make collaboration seamless and impactful for your youth and caregivers. If aligned, next steps would include requesting a proposal and finalizing a partnership agreement.

With gratitude,

Ty Johnson
Founder & Program Director
